

CSUS Departmental Report for January 27th 2016

- CSUS is preparing to reimburse selected students who attended CUSEC, a Computer Science conference that took place from January 14th to 16th.
- We're looking into getting some funding to replace the chairs in Trottier 3rd floor, a lot of them are broken and are just extremely uncomfortable. Were thinking of using some of our budget as well.
- Started planning out the review sessions that we'll be holding for midterms. Will try to book rooms and find tutors.
- We need to make constitutional amendments. We contacted SUS and AUS to find out the procedure. Once we know exactly what to do, we'll get to it as it is fairly important.
- Trying to organize more equity in computer science events as well as maybe organizing an event with Concordia students.
